ABOUT ME

As a dedicated frontend and MERN stack developer, I have experience building scalable web applications using MongoDB, Express.js, React.js, and Node.js. I specialize in creating seamless full-stack solutions that focus on efficiency, security, and user experience. With strong problem-solving skills, I excel at integrating APIs, optimizing performance, writing maintainable code, and continually improving my development skills.

PROJECTS

Name: Study Buddy Network

Type: Online Collaborative Learning

Time period: 4 days

- Online study rooms allow users to create or join online spaces dedicated to collaborative learning.
- Users can engage in real-time discussions, collaborate on study materials within a different environment, simulating the experience of a physical study group.
- Streamlines the assignment submission process, provides a centralized location for feedback, and enhances collaboration on group assignments within the study group.
